

PLAYING TO LEARN AND LEARNING TO PLAY

Pediatric occupational therapy services for children, teens and young adults
in Los Angeles' South Bay Communities.

PlaySense believes every child is unique and amazing. We feel a comprehensive therapy plan should be designed individually with the needs of the family in mind. We know how to make hard work seem fun. We believe that every child should feel confident, successful, and supported when faced with a challenge.

We understand play is the job of childhood. We know children learn through play. A solid foundation promotes growth and successful participation in everyday activities. Therefore, we look for the just right challenge that is the perfect mix of fun and work that will keep your child asking for more.

PlaySense is located in Los Angeles' South Bay, serving Palos Verdes, Torrance, San Pedro, Redondo Beach, Hermosa Beach, Manhattan Beach, El Segundo and Hawthorne.

A NOTE FROM DR. BALTAZAR MORI PEDIATRIC OCCUPATIONAL THERAPIST

Welcome to playSense! We are a small practice of highly accomplished therapists focused on providing thoughtful,

thorough and effective support to our children and families.

As licensed Occupational Therapists, we bring into each session an in-depth knowledge of sensory integration, development, a caring approach and playful energy. All of our therapists have worked in a variety of settings including clinics, preschools, elementary through high schools, homes and in the community. Our therapists are highly skilled. We always aim to build your child's abilities in ways that are playful and fun.

I'm proud of the accomplishments of our playSense team. Our therapists have advanced training in sensory integration, certification in feeding and swallowing, and hold Masters or Doctorate degrees in Occupational Therapy. We serve as educators both

nationally and internationally. Our clinic is associated with well known universities around the country. We regularly participate in research and collaborations to ensure the considerations we share with you are relevant to your child's unique needs, evidence-based, and current.

“

Thank you for taking time to get to know us. We look forward to getting to know you, your child and family.

—Annie
